JACK UP YOUR TECHNOLOGY PROJECTS USING WEB 2.0

I have created a web site with many different projects in the areas of: Computer Science Classes, Multimedia Classes, Computer Applications-Type Classes, Web Design Classes, and Business/Finance Classes.

On these pages you will find links to project examples, instructions and rubrics, links to the actual Web 2.0 site and information on how it has been used in the classroom.

I have also included a page of teacher resources, articles, newsletters, and web sites as well as some Web 2.0 tools specifically for teachers that will help with classroom organization and management.

The web site is a constant work-in-progress as I am continually adding information, so you may want to check back several times throughout the year as you plan.

The web site is: <http://nortonbcs.weebly.com>

I also have a Pinterest Account: [pinterest.com/computerqueen85](https://www.pinterest.com/computerqueen85)

I also have a YouTube Channel: [youtube.com/nortonBCS](https://www.youtube.com/nortonBCS)

My school email is: cara_norton@gwinnett.k12.ga.us
